What would become E-I-E-I-Owe Farms, LLC was begun on June 20, at the beginning of this millennium. We started our venture into the commercial meat goat world in 2001 with the purchase of 7 Boer crossbred does and a Boer cross buck. As our herd grew in size and quality we decided we wanted to concentrate less on the commercial and more on the registered breeding end of the Boer Goat Industry. We began that journey with the purchase of our first registered female in 2004.

From the beginning, our goal has been nothing short of excellence. We strive to provide structurally correct, well muscled, feminine, balanced, and well bred replacement does with a keen eye on performance and production. Our bucks are performance proven and boast enviable gains while offering style and appeal. We also pride ourselves in offering a very unique set of genetic material gained through generations of rigid selection on both, the sire and dam sides of the pedigree. In short, goats that can compete successfully in any facet of the industry. Herd improvers and changers that can make a positive impact in your operation!

Along the way, we have had the good fortune of meeting, doing business with, learning from, and making friends with some of the finest people to be found anywhere. We thank you, our fellow Boer breeders and producers for your acceptance and confidence in our product and program. Your approval with your past purchases and successes has been gratifying. Rest assured, we will continue to set our goals to the highest standards of quality, service, and integrity. So bid and buy with confidence. These really ARE "Show Quality" Boers that represent our best efforts.....so far.
